

addaset

Resin Bound Decorative Surfacing

The Addaset Resin Bound surfacing system provides an attractive, hardwearing, low maintenance surface using a range of natural and recycled aggregates and glass. The finished surface provides a cold applied bound paving system which is flexible, UV stable and resistant to cracking. Porous grades are available on request.

addagrip

"Addaset gives you the opportunity to let your imagination come to life"

Pottersfield Park - London

Benefits

- Aesthetically pleasing
- Durable
- Low maintenance
- Natural and Recycled aggregates
- UV Stable
- Creative design is limited only by your imagination
- Can be applied to asphalt, concrete or other suitable substrates

Addaset offers a smooth trowelled finish that has no loose aggregate. It is ideal for many situations from footpaths, drives, parks, school playgrounds, swimming pool surrounds and patios, to exhibition and showroom floors.
